Sep 2011 - Jun 2015

Professional Summary

I find immense joy in the process of creating, building, and experimenting with various technologies. My journey in the tech realm has been one of continuous growth and learning.

Work Experience

Oct 2022 - Sep 2023

Lumenspei | Lumenspei Digita

CTO | Team lead | Software Developer

Founding member and CTO. In my primary function as a CTO i was part of client negotiations and project planing, conducting technical interviews and mentorship. Also, I have worked in most of the company's projects in some capacity. Either as an architect, team lead or project manager. Projects I have worked on include various React Native applications, visual coding editor for smart contracts and others.

Jul 2022 - Oct 2022

Freelance/Contract

Software developer

I was a part of a small team that was tasked to develop a dApp on the Ethereum network. My responsibilities involved development work on the React client side app and NodeJS backend.

Apr 2022 - Aug 2022

Vega IT

Software developer

Worked as a developer in a team responsible for maintaining a group of websites for a large international corporation. Primary technologies used were NextJS and Contentful.

Jan 2021 - Apr 2022

Codexsto

Software developer

Worked as a software developer on a wide variety of projects and teams. Mostly worked with Nextjs, React/React Native to NodeJs and Firebase(functions).

May 2020 - Jan 2021

Exeplay

Software developer | Game Developer

Worked mainly as a game developer working on multiple published mobile games primarily using Unity game engine. Alongside game development I was a tasked with creating internal developer tools some of which were game administration systems written primarily in VueJS..

2018 - Apr 2021

Freelance

Front end developer,

I worked as a React front end developer on a booking/store site for a massage studio based in Niš, Serbia.
